EXHIBIT "A"

Lyon County, a political subdivision of the State of Nevada, as successor in title to Permits 29624, 30107, 43084, 34292 & 35561 is filing five (5) applications to change in order to comingle all the rights under the above mentioned permits.

Permits 29624, 30107 & 43084 were issued to serve the Mark Twain Estates (also known as Dayton Valley Estates) subdivision. Permits 34292 & 35561 were issued to serve the Daytona Heights subdivision. Title to the water rights supplying these subdivisions has passed to Lyon County and the necessary documents were submitted to the State Engineer's office.

The water systems that service these two subdivision are interconnected. Dayton Utilities, operator of water systems for Lyon County in the Dayton area, has a long range plan to interconnect all of its water systems and expand its service areas to cover all areas requiring water service. Eventually all water rights are to be co-mingled and the places of uses expanded. This phase of the plan involves co-mingling the water rights under these permits and ensuring that the place of use covers both subdivisions.

The total combined duty of all five applications to change is not to exceed 181.77 million gallons annually.
